

# Sustainability Programming Partnership Interest Form

Dear Member of the UCI Community,

As we grow our sustainability centered programming in Student Housing, we invite you to join our list of potential speakers and excursion hosts. Student Housing embraces its unique access to the campus community, with the goal of increasing environmental sustainability through education and agency of residents and employees throughout the department. Together we will serve as change agents and adopt a life-time of behaviors that foster healthy environments, social justice, and economic viability.

Each year Residence Life staff invite UCI faculty, staff, and community members to present in-hall programs for on-campus residents. We additionally seek out opportunities for field trips, community service, or professional staff engagement. Such partners are invited to share their research, skills, and insights on a variety of current topics. Co-curricular residence hall programming provides learning opportunities to create connections, develop skills, and supplement the knowledge and experiences gained in the classroom. This tool can greatly impact the personal growth of students as we help to maximize their potential.

Please fill out the form linked below and indicate your interest to offer a short presentation on:

- current research or topics in sustainability
- a skill share or hands-on demonstration, from cooking to gardening and beyond
- a field trip, tour, or service opportunity
- or another appropriate topic.

Please note these general guidelines for in-hall programming.

- Most in-hall programs occur after 5:00pm or on weekends when students are out of class. Professional staff engagement events will likely occur during working hours.
- The speaking portion of presentations should be limited to no more than 20 minutes and actively engage listeners.
- Speaking presentations are ideally paired with a hands-on activity, video, or other social component. Staff can assist with this and may have a small budget for supplies.
- Residence Life staff will help you tie the theme of the program to at least one of five Student Affairs learning domains:
  - Civic and Community Engagement
  - Leadership Development
  - Diversity & Global Consciousness
  - Administrative & Professional Skills
  - Personal Responsibility
